

The Responder[®] 5, More than Nurse Call

The Future of Nurse Call is Here, Available Today - For Better Patient Care Tomorrow

The Responder 5

"It is an exciting time for us here at Rauland. We anticipate a successful year with the release of a new revolutionary product. The capabilities of the Responder 5 platform enables use outside the patient room and opens up a whole new arena of applications for hospitals. We have had nothing but positive feedback so far and look forward to today and the endless possibilities for the future."

-Larry Ball, Director of Marketing,
Rauland Healthcare

The Release.

Skokie, IL, December 2008- Rauland Borg Corporation, the leader in nurse call communications, announced the full-release of the innovative new Responder 5 Nurse Call System. The system was initially unveiled in February 2008 at the HIMSS Trade Show event in Orlando, FL. Since the Responder 5 has been installed in multiple facilities throughout the US and Canada with huge success.

The Response.

Positive feedback was obtained from our customers with a clear excitement of utilizing the new system to enhance communication efforts throughout their facilities. The Responder 5 is a new standard for nurse call and offers an advanced solution for workflow processes the staff never thought possible. With integration to wireless technology, the nursing staff was eager to upgrade their wireless phones to give them more mobility and connection to their patients "real-time" from anywhere throughout their unit. The features and functions of the user-friendly system and capabilities of integration was exactly what the staff was looking for to make their jobs easier.

“We have dedicated more than 30 years to building exceptional systems that answer the needs of our customers. We believe the Responder 5 system will be a huge value to hospitals - even more than standard nurse call - to enhance patient care and staff job satisfaction.”

—Maureen Pajerski, VP of Sales & Marketing, Rauland Healthcare.

**We are
nurse call.**

Responder 5 in Action.

Once you see the Responder 5 in action it becomes clear what sets Responder 5 apart from other nurse call systems. Responder 5 improves hospital staff workflow by enhancing the mobility of nurses and the communication between staff and patient. Its proven reliability ensures patients staff is just a button-push away with the ability to answer calls through their wireless device or direct route to a nurse console station. Either way a patients call will be answered, real-time, to the direct caregiver - every time.

Responder 5 Product Highlights.

The Responder 5 is a complete, sophisticated solution that integrates with other hospital equipment and technologies. It offers simplicity with true VoIP Integration, enhanced software features and gives staff the ability to simplify workflow and establish call processes that fit their environment. With stations like the audio bath pull-cord, the system provides voice communication capabilities in bathrooms – not available with any other nurse call system. With the workflow station call processes can be programmed for environmental services, pharmacy or the OR within the hospital unit. All these components and more relieve the nursing staff from frustrating routine calls and maximize their efficiency to provide effective patient care. Nurses are not the only staff who benefit, IT loves to hear that Responder 5 operates in conjunction with from the hospitals LAN and puts low demand on their staff. What else could you ask for?

About Rauland-Borg Corporation.

For over 70 years, Rauland-Borg has been the industry leader in manufacture and design of communications and life-safety equipment for institutional environments.

Rauland Responder® Nurse Call combines traditional nurse call components with the latest technology and software management tools.
