

# Location Technology for Every Facility

LOCATE STAFF, PATIENTS  
AND ASSETS TO  
IMPROVE CLINICAL  
EFFICIENCIES IN EVERY  
FACILITY

EveryWear complements the secure, scalable and highly available Responder Enterprise, integrating with other functions, from the Clinical Mobile app to Converge, to real-time dashboards and beyond, for a dynamic and individualized user experience.

Rauland EveryWear™ is an innovative, real-time wearable location system for hospitals of every size that empowers clinical teams and improves quality of care and overall productivity. EveryWear utilizes Bluetooth® Low Energy wireless technology and your existing Wi-Fi or Power over Ethernet (PoE) network, providing bed-level accuracy to assure time spent with patients is recorded accurately. Use real-time dashboards to make faster decisions, apply best practices across multiple facilities and improve efficiencies in clinical workflow. By locating staff, patients and assets, you can better manage flow, patient safety and satisfaction, compliance and overall productivity to deliver exceptional patient care every day.

## **BENEFITS OF A RAULAND EVERYWEAR ENABLED HOSPITAL:**

**Real-Time Location** — Locate staff and patients to better manage workflow, patient safety and satisfaction and review historical data for contact tracing

**Staff Responsiveness** — Automatically document response times and duration for each patient request or encounter

**Rounding Compliance** — Alert and monitor compliance for better HCAHPS and receive greater visibility into performance and staffing to help improve workflows and efficiency

**Asset Tracking** — Track all types of hospital equipment for preventative maintenance and optimal equipment utilization rates

**Hygiene Practices** — Measure clinical hand hygiene practices and compliance<sup>1</sup>

## KEY FEATURES

- Indicate and log staff presence with patient
- Provide touchless call cancellation to minimize Hospital Acquired Infections (HAIs)
- Minimize over purchasing of portable equipment and reduce asset shrinkage
- Improve the resolution and granularity of your Reports and Dashboards
- Reduce ongoing costs with energy efficient technology
- Affordably scales from unit/floor to enterprise
- Use for contact tracing to slow the spread of infectious diseases
- Leverage existing wireless network without cost of proprietary wiring
- Use the same infrastructure to support hand hygiene compliance (with partner GOJO Industries<sup>2</sup>)

## Exceptional Patient Care, Every Day with EveryWear

Workflow automation is key to delivering the best patient outcomes. Every day, clinicians are asked to do and remember more, but the very nature of patient care is reactive. Aiding clinicians with a real-time location system moves the needle for automatically driving clinical behavior.
